FRAMEWORKS

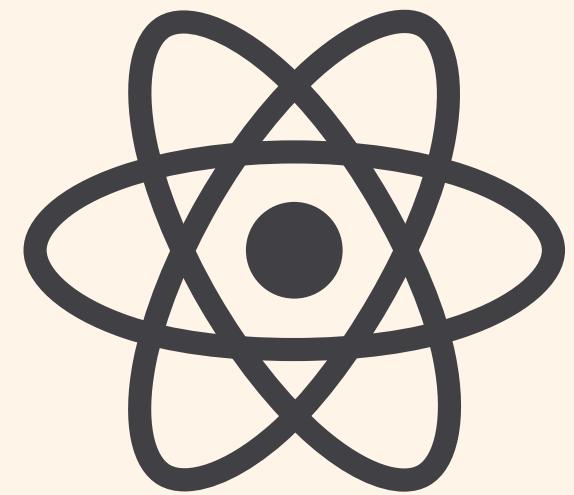

# SOLUTIONS TECHNIQUES

## React

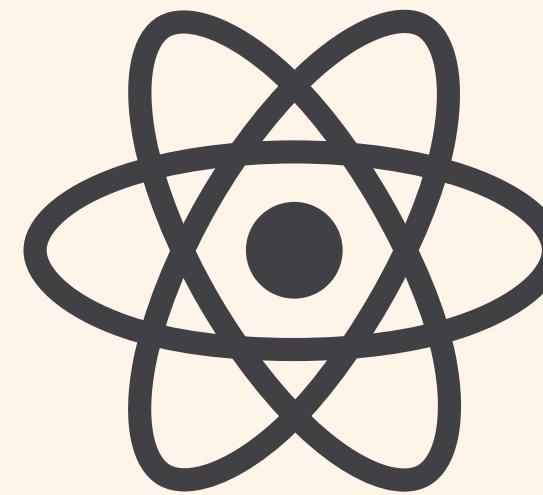

- **React JS** : bibliothèque JavaScript la plus populaire utilisée pour construire des interfaces utilisateur.
- **Node JS** : environnement d'exécution multiplateforme permettant de créer toutes sortes d'applications et d'outils côté serveur en JavaScript.
- **MongoDB** : base de données NoSQL la plus populaire. Très flexible et évolutive.

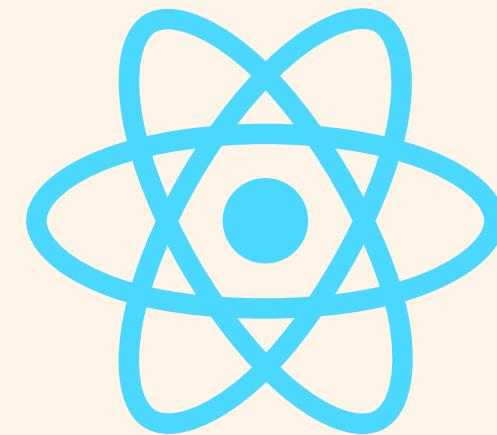

# React

- Bibliothèque JavaScript
- Construction d'interface
- Composants réutilisables
- Développée par Facebook
- Écosystème riche
- Communauté active et soutenue

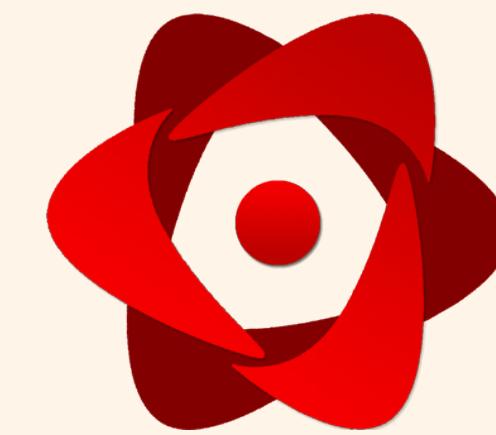

# React

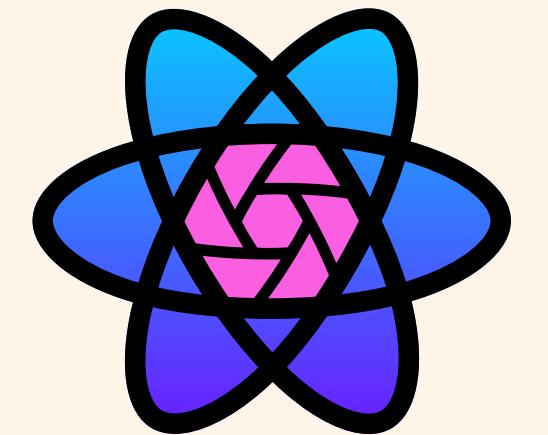

## React-Modal

Permet de créer simplement des modales performantes.

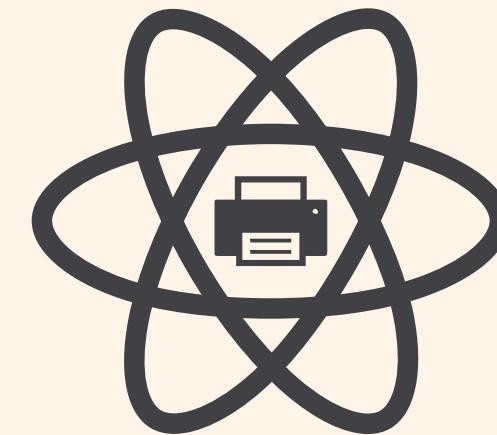

## React-to-PDF

Permet de créer des documents PDF.

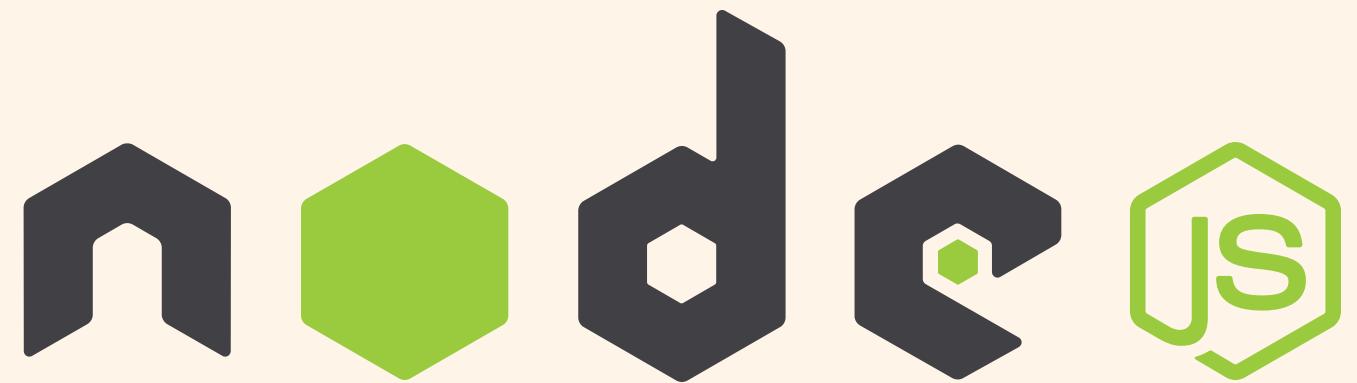

## React-to-Image

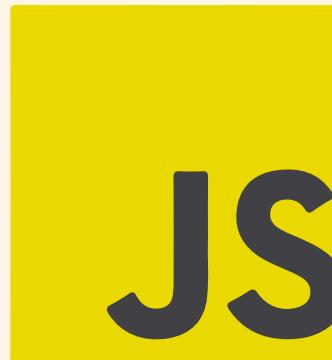

Permet de convertir des composants React en images.

## React-to-Print

Permet de gérer l'impression de contenu.

Express  JS

The word "Express" is in a large, thin black font. To its right is a yellow square containing the letters "JS" in a bold, black, sans-serif font.

Nodemailer

 Passport

The logo for Passport consists of a stylized letter "P" composed of four colored segments: light blue, grey, dark blue, and light green. To the right of the "P" is the word "Passport" in a large, green, sans-serif font.

- **Express JS : framework web minimaliste et flexible pour Node.js. Permet la création d'une API permettant de lier le Front-end et le Back-end.**
- **Nodemailer : librairie pour Node JS qui facilite l'envoi de mail. C'est la plus populaire dans son domaine.**
- **PassportJS : permet de gérer l'authentification des utilisateurs. Il agit comme une passerelle entre les applications, outils et bases de données.**
